Pat O'Daniel for Governor
Headquarters,
3409 Oak Lawn
Dallas, Texas
March 8, 1968

FOR RELEASE ALL SERVICES

I have lived very close to politics in Texas and that of our national government for many years, being the son of one of your former Governors and United States Senators, the Honorable W. Lee O'Daniel, who is the only man to ever defeat our now President of the United States, Lyndon Baines Johnson.

My Platform is the Ten Commandments and the teachings of Christ, a tried and proven one, being the Platform of my father through out his career in serving you as Governor and United States Senator. This will be the yardstick that I will use in all matters affecting the people of this State.

As for Liquor by the drink, I advocate that we not open up our State to the underworld and crime syndicate by allowing liquor by the drink in our State. As your Governor, I will seek the passage of a law requiring that all persons handling alcholic beverages be properly identified with local and State authorities, so as to weed out those of undesirable character or who have criminal records. A fair and just yearly license fee will be required of all who handle alcholic beverages, with an I-D card and picture being issued. You have adequate liquor laws, all that is needed is the firm and impartial enforcement of these laws. As your Governor I will see that you receive the enforcement of these laws and also the enforcement of those laws pertaining to crime and violence. The cost of the added law enforcement along with the human misery that would be the result of the "Opening UP" of our State, would be far more than the tax revenue that would ever be realized.

One of the most important professions in our State is the teaching of our young folks. The teachers in our Public Schools are woefully underpaid. This in itself is wrong and will be attended to without delay. As your Governor I will seek the immediate righting of this wrong and will attempt to put Texas at the top of the list in the teaching profession. Thirty-third best is not good enough for Texas! The results that would be derived from the best training possible for our future adults, would far outweigh any expense necessary to bring our teaching standards up to the top position in our great nation. The cost for the best training possible is an asset, not a deficit.

I advocate equal pay for women at all levels.

Our old age pensioners should receive at least $100.00 per month in full. This can be possible by relieving the case workers of their investigations and with-
